1 Introduction

This document provides instructions for deploying the Apricart web application on staging and production servers using Docker and SSH. It also includes commands for managing permissions and accessing AWS and Godaddy accounts.

2 Docker Commands

```
1 docker system prune
2 docker build -t apricart-backend:latest .
3 docker run apricart-backend
4 docker ps
5 docker cp <container_id>:/usr/src/app/target/apricart-spring-boot-SNAPSHOT.jar <local_path>
```

2.1 Example

```
1 docker cp b875891a1190:/usr/src/app/target/apricart-spring-boot-SNAPSHOT.jar /Users/kashafarshad/Desktop/Projects/Apricart/target
2
3 docker cp d4b48d50e071:/usr/src/app/target/apricart-spring-boot-SNAPSHOT.jar /Users/kashafarshad/Desktop/Projects/apricart-saudi/target
```

3 SSH Commands

```
1 ssh -i <key_file>.pem ubuntu@<staging_ip>
2 ssh -i <key_file>.pem ubuntu@<production_ip>
```

3.1 Example

```
1 ssh -i cbe_staging.pem ubuntu@15.184.175.162
2 ssh -i cbe_production.pem ubuntu@15.185.231.82
3 ssh -i production_web.pem ubuntu@15.185.225.162
```

4 Deployment Procedures

4.1 Staging Server

1. SSH into staging server.
2. Access the appropriate screen session: `screen -r website` or `screen -r admin-portal`.
3. Perform a Git pull, providing your username and personal access token.
4. Build and start the service: `npm run build && npm run start`.
5. Detach from the screen session: Ctrl + A, then Ctrl + D.
6. Close the terminal.

4.2 Production Server

Repeat steps 1-5 for the production server.

5 Permissions Management

```
1 chmod 400 <key_file>.pem
2 icaccls <file_path> /inheritance:r
3 icaccls <file_path> /grant:r "%username%": "(R) "
```

6 Credentials

6.1 AWS:

- Email: kashaf.arshad@apricart.pk
- Password: KashafMazhar@2022

Dev user - frappe

- Username: Frappe
- Password: QWERTY1@3

6.2 Zoho:

- Email: info@apricart.ai
- Password: Apricart2024

6.3 GoDaddy:

- Email: admin@apricart.pk
- Password: R5ve74nrjsXf3azNE8C6w9

6.4 GoDaddy - Email:

- Email: admin@apricart.pk
- Password: apricart@2024

6.5 ERP:

- URL: <http://erpnext.apricart.pk/login>
- Username: admin
- Password: createch@90025

6.6 Trello Account:

- Email: admin@apricart.pk
- Password: 090078601apri

6.7 Pakistan (PK) Account Credentials

- Google Account - Email
 - Email: support@apricart.pk
 - Password: apric@rt2024
- Apple Connect Store:
 - URL: <https://appstoreconnect.apple.com/>
 - Email: support@apricart.pk
 - Password: \$Aj1d@Za6Ir&V-X
 - Account Name: APRICART E-STORES (PRIVATE) LIMITED
 - App-Specific Password: kjkl-muip-amuf-xvcw:
 - Team ID: 2T25GJTP7T
 - Developer ID: 65bf7e99-c33d-4bce-8875-2c21d99abb99
 - Phone: +971 55 264 3573, +92 340 5117888
- Google Play Console & Store:

 - Email: customersupport@airoso.pk
 - Password:
 - Account Name: APRICART E-STORES (PRIVATE) LIMITED
 - Account ID: 8462363552438140190
 - Phone:

6.8 Saudi Arabia (KSA) Account Credentials:

- Google Account - Email
 - Email: `apricartksa@gmail.com`
 - Password: `090078601@pi`
 - Backup Codes:
 - 7018 8228
 - 1127 9900
 - 6147 6361
 - 5302 9992
 - 6931 6248
 - 5509 5015
 - 8636 5614
 - 0500 4071
 - 0066 8917
 - 8328 2888
 - Email: `apricart.ai@gmail.com`
 - Password: `apricart@1234`
- Google Console
 - URL: `https://console.cloud.google.com/`
 - Email: `apricartksa@gmail.com`
 - Password: `090078601@pi`
- Google Play Console - PlayStore
 - URL: `https://play.google.com/console/`
 - Email: `apricart.ai@gmail.com`
 - Password: `apricart@1234`
 - Account Name: Apricart Trading Company
 - Account ID:
 - Phone: `+92 340 5117888`, `+966 54 008 0901`
- Apple Connect Store
 - URL: `https://appstoreconnect.apple.com/`
 - Email: `apricart.ai@gmail.com`
 - Password: `090078601@Ksa`
 - Account Name: Apricart Trading Company
 - App-Specific Password:
 - Team ID:
 - Developer ID:
 - Phone: `+971 55 264 3573`, `+92 340 5117888`

7 Additional Notes

- Ensure all necessary dependencies are installed before deploying.
- Monitor logs and services for any errors during deployment.
- Refer to AWS and Godaddy documentation for further assistance.
