

Device Specifications

Android Version: 9-Pie

Brand: OPPO

Model: A1K

2- Functionality Issues

→ OTP Verification Screen

- ◆ By tapping the verify button without adding the OTP, the request is being sent to the server, Add empty field validation before sending the request.
- ◆ If putting the app in the background on the OTP verification screen while registering and reopening the app results in a loss of the state navigating back to the home screen.
- ◆ The category section has duplicate categories.

→ Home Screen

- ◆ After updating the location other than the selected city, getting the correct error but the text of the location field is changed to the current address.

→ Add Address Screen

- ◆ After updating the location the app is in the full screen.

→ My Cart

- ◆ After Removing a Coupon and adding a new one, getting the coupon is not found.

→ Account Screen

- ◆ Change of city not working.

→ Sign In Screen

- ◆ If a user is not active then navigate to the OTP verification screen.

→ Order Details

- ◆ The reorder button not working.

→ Register

- ◆ On Tapping the Register Button Progress Bar / Loader does not display.

NOTE:

- The Progress bar / Loading animation should not be canceled by tapping the back button.
- After installing a new version of the APK a blank white screen appears until I clear the cache and relaunch the application.
