The form fields are: 'Full Name*' (with a sub-field 'Enter First Name'), 'Phone Number*' (with a dropdown for '+966' and a sub-field '0000-0000'), 'Password*' (with a sub-field 'Enter Password'), 'Confirm Password*' (with a sub-field 'Enter Password'), 'Trade License' (with a sub-field 'License#'), 'Nature of Business' (with a sub-field 'Enter Nature of Business'), 'Complete Address*' (with a sub-field 'Enter Complete Address'), and 'Salesperson ID' (with a dropdown showing 'Ex - App11246' and a chevron icon). A yellow 'Submit' button is at the bottom, followed by a link 'Already have an account? Sign in'.

2- Functionality Issues

→ OTP Verification Screen

- ◆ By tapping the verify button without adding the OTP, the request is being sent to the server, Add empty field validation before sending the request.
- ◆ If putting the app in the background on the OTP verification screen while registering and reopening the app results in a loss of the state navigating back to the home screen.

→ Home Screen

- ◆ The switching between different tabs on the bottom nav bar is slow on low-spec devices.
- ◆ No back navigation in the address update screen on the home screen.

→ Location Screen

- ◆ After updating the location the app is in the full screen.

→ Category

- ◆ The category screen has duplicates of special offer categories.

→ Category -> SubCategory

- ◆ If the subcategory doesn't have any products then display a message in the center of the screen instead of a blank screen.
- ◆ If a category contains 2 subcategories but only the second category has the products, Initially no product toast appears but after navigating to the second category the products show but when navigating back to the first category the same products are still there.

→ Product Detail Screen

- ◆ The counter of quantity is slow in updation, and the quantity's counter is not being updated in real-time.
- ◆ The product with low stock i.e. 8 and I'm able to add 8+ products to the cart.
- ◆ The last added quantity is not being reset to 1 in other products.
- ◆ Incorrect name of Similar items.

→ My Cart

- ◆ By tapping the apply coupon button without adding the coupon, the request is being sent to the server, Add empty field validation before sending the request.
- ◆ If a coupon is already applied to an order then the apply coupon button should be changed to remove the coupon, the user has to first remove the already added coupon then he should add a new coupon.
- ◆ Increase the size of the Add/Remove quantity button, hard to increase/decrease the quantity.
- ◆ Tax values are null but from the backend, they are already there.

→ **Add Address Screen**

- ◆ Address Type's Icon is small and should be adjusted according to the screen.

→ **Feedback Form**

- ◆ When opening the feedback form screen by default the phone text field is selected.
- ◆ All zeros can be added as a phone number add Regex to validate the number.
- ◆ Tapping the Submit feedback button multiple times results in multiple hits to the server.
- ◆ The Icon size should be adjusted according to the screen size.

→ **Product Request**

- ◆ The keyboard type of quantity should be numeric.
- ◆ Only positive and greater than 0 values should be added in the quantity field, Able to add -1 & 0 as quantity.
- ◆ If the image is not selected then not any error is thrown.
- ◆ The Icon size should be adjusted according to the screen size.

→ **Edit Profile Screen**

- ◆ Tapping the Update profile button multiple times results in multiple hits to the server.

→ **Checkout Screen**

- ◆ Not able to delete and update the addresses.

→ **Account Screen**

- ◆ The floating buttons of Feedback & Product Request should not appear in the account screen as they are already there in the My Account section.
- ◆ Change of city not working.

→ **Sign In Screen**

- ◆ Continue as the guest button navigates to the register screen.
- ◆ Change of city not working.
- ◆ If a user is not active then navigate to the OTP verification screen.

→ **Change Password Screen**

- ◆ Add empty check on password fields, Tapping the update password button on an empty password results in sending a request to the server.
- ◆ If the page description is larger than the screen size then add dots(...) to the description.

→ **My Orders**

- ◆ By Tapping the cancel button while in progress if I tap the back button then a black screen appears.
- ◆ The delivered Order Status not working, the delivered order is still pending.

→ **Forgot Password**

- ◆ Add empty check validation on the phone number.

→ **Order Details**

- ◆ The reorder button not working.

→ **Register**

- ◆ On the Registration screen, All zeros are being accepted as phone numbers add Regex to validate the number.

NOTE:

- The Progress bar / Loading animation should not be canceled by tapping the back button.
